

Meet the little dude that is Dudley!

At 4 yrs of age, Dudley found himself in the pound, but from there his life began. First he got to ride the ferry to make it to the other side of town to commence his rehab. Then he went to see the good Dr who operated on his eye lids and miraculously stopped the pain of his eye lashes rubbing on his eye balls (entropion surgery).

Dudley then met all the other dudes and dudettes in rescue. OMG fur kids everywhere. Dudley has settled well into rescue. He is only a little fella, so he is quite a way down the "pecking" order, but none the less he gets on with other male and female dogs alike.

Dudley is looking for a nice family to call home. He would love a female companion, and in return for his keep Dudley will walk well on the lead, sit on call and loves a car ride. Dudley is great with kids, and would especially love to have a kid or two in his new home. A warm bed indoors and 2 x meals a day and Dudley will be your best friend.

Available now, Dudley's adoption fee is just \$680 and he is good to goooooooooo

Dudley is desexed, C5 vaccinated and microchipped. As stated previously, he has had his entropion surgery and is now just waiting for his perfect forever home to appear. Could that be at yours???
